

The Virtual Space Cardboard 2 Instructions

<http://thevirtual.space>

Opening the Cardboard 2

Slide the Cardboard 2 out of its sleeve and remove the protective stickers from the lenses. Open the front flap, unfold the hood, flip the hood over and fasten the hood velcro connectors as shown in diagram 1.

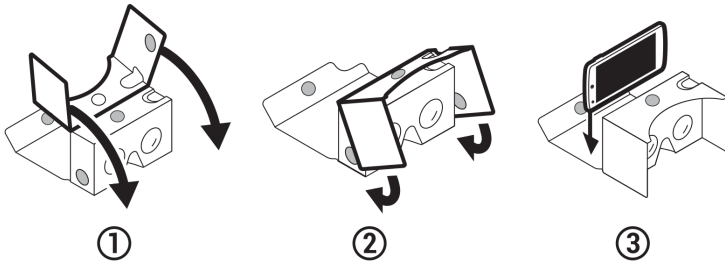

Diagram 1

The head strap option is fitted as shown in diagram 2 below.

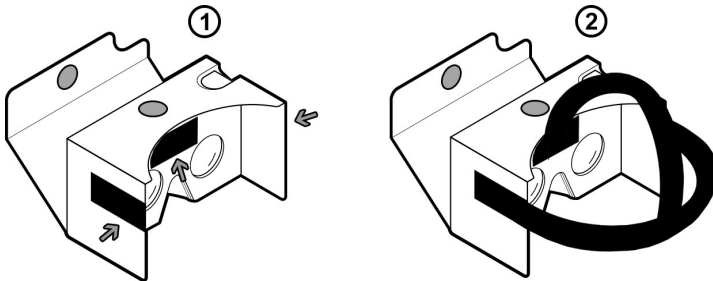

Diagram 2

Cardboard 2 smartphone requirements

Android - Android phone with Android 4.1 or later, with a gyro sensor and magnetometer. To check for compatibility use the EZE VR app from Google Play.

iPhone - iPhone 5 or later with up to date iOS.

Configuring the smartphone

Android - Install the “Cardboard” app by Google from Google Play.

iPhone - Install the “Cardboard” app by Google from the App Store.

On starting this app you will be prompted to scan the QR code on the Cardboard 2. Scan the QR code and the Cardboard app will configure your phone for the Cardboard 2. The Cardboard app has a bunch of things to do with your Cardboard 2.

Other cool apps

Take VR photographs with “Cardboard Camera” by Google - Android only

View panoramic photos on iPhone with “RoundMe”

Experience virtual travel with “Street View” by Google - Android and iPhone

Watch 360° and 360° 3D videos with “YouTube” - Android only

Watch 360° and 360° 3D videos on iPhone with “in360Tube”

Search on Google Play or the Apple App Store for “cardboard” or “VR” for more apps

Have fun! :-D
